#### INTRODUCTION

Final figures from the 1961 Housing Census are shown in this report which is one of a series comprising Volume II (Part 2) of the 1961 Census. Occupied dwellings are classified by type and source of water supply, bath facilities, toilet facilities and method of sewage disposal for:

- (i) provinces, rural farm, rural non-farm, and urban size groups (Tables 35, 40);
- (ii) counties and census divisions (Tables 36, 41);
- (iii) incorporated cities, towns and villages of 5,000 and over, and other municipal subdivisions of 10,000 and over (Tables 37, 42);
- (iv) census metropolitan areas (Tables 38, 43);
- (v) other major urban areas (Tables 39, 44).

Data in this report are based on a 20 p.c. sample of dwellings from which hotels, large lodging houses, institutions, camps and other such collective-type dwellings are excluded. Due to sampling variation, estimates of less than 100 are not shown, but are indicated by the symbol (--).

#### **Definitions**

#### Dwelling:

For census purposes, a dwelling is a structurally separate set of living quarters, with a private entrance either from outside the building or from a common hall or stairway inside. The entrance must not be through anyone else's living quarters.

#### Water supply:

Running water refers to water which is piped inside the dwelling and controlled by a tap. Water from a hand pump inside the dwelling is not considered to be piped running water.

#### Source of water supply:

"Municipal mains" refers to water piped through municipal mains or from any other source outside the private lot on which the dwelling is situated. "Private source" refers to a well, spring or other private source located on the property on which the dwelling is situated.

#### Bath facilities:

Installed bath or shower facilities are those operated from a piped water source and controlled by a tap and drain. "Exclusive use" refers to use of bath facilities by members of one household only. "Shared use" refers to common bath facilities shared by more than one household, i.e., by the occupants of two or more dwellings. It does not refer to facilities shared by two or more families, or by individual lodgers, within the same dwelling.

#### Toilet facilities:

Inside flush toilet refers to a flush toilet located inside the building, not necessarily inside the dwelling. "Exclusive use" refers to use by members of one household only. "Shared use" refers to common toilet facilities shared by more than one household.

Le présent rapport contient les chiffres définitifs du recensement de l'habitation de 1961. Le rapport fait partie d'une série qui constitue le volume II (partie 2) du recensement de 1961. Les logements occupés sont classés par genre et suivant le système d'alimentation en eau, les commodités de bain et de toilettes et le système d'évacuation des eaux d'égout dans les:

- i) provinces, régions rurales agricoles et non agricoles, et régions urbaines par tranche de taille (tableaux 35, 40);
- ii) comtés et divisions de recensement (tableaux 36, 41):
- iii) cités, villes et villages constitués de 5,000 habitants et plus et autres subdivisions municipales de 10,000 habitants et plus (tableaux 37, 42);
- iv) zones métropolitaines de recensement (tableaux 38, 43);
- v) autres grandes agglomérations urbaines (tableaux 39, 44).

Les données du présent rapport se fondent sur un échantillon de 20 p. 100 des logements qui exclut les hôtels, les grandes maisons de chambres, les institutions, les camps et autres logements collectifs du même genre. En raison des variations du sondage, les estimations de moins de 100 ne paraissent pas mais sont indiquées par le signe conventionnel (--).

#### Définitions

#### Logement:

Aux fins du recensement, un logement est un ensemble de locaux d'habitation distincts du point de vue structurel, qui a son entrée indépendante de l'extérieur par un passage ou un escalier commun dans le bâtiment. On y pénètre ou on en sort sans traverser les locaux habités par d'autres personnes.

#### Eau:

Eau courante signifie l'eau canalisée à l'intérieur du logement et réglée par un robinet. L'eau provenant d'une pompe à bras à l'intérieur du logement n'est pas considérée comme eau courante canalisée.

#### Système d'alimentation en eau:

"Service municipal" désigne l'eau canalisée de l'aqueduc municipal ou de toute autre source située en dehors du lot sur lequel est situé le logement. "Source privée" désigne un puits, une source ou autre source privée sur la propriété dans laquelle est situé le logement.

#### Commodités de bain:

La baignoire ou douche installées sont celles qui sont reliées à une canalisation d'eau et munies d'un robinet et d'un tuyau d'écoulement. "Usage exclusif" veut dire usage par les membres d'un seul ménage. "Usage partagé" signifie des commodités de bain communes partagées par plus d'un ménage (par les occupants de deux logements ou plus). Cela ne vise pas les commodités partagées par deux familles ou par des chambreurs habitant le même logement.

#### Toilettes:

"Toilettes intérieures avec chasse d'eau" veut dire toilettes avec chasse d'eau à l'intérieur de l'immeuble et non nécessairement à l'intérieur du logement. "Usage exclusif" veut dire usage par les membres d'un seul ménage. "Usage partagé" signifie toilettes communes dont l'usage est partagé par plus d'un ménage.
